

MOLDABLE SKIN BARRIER AND DRAINABLE BAG APPLICATION

NATURA™

Scan QR code to watch **Bag Application Video**

Step 1. Getting the right fit

Measure the stoma and select the appropriate size of moldable skin barrier.

Mold the barrier with your fingers, then roll and shape the disc to the size of your stoma. Do not stretch, pull or cut.

Peel off clear release liner from the reverse of the barrier. Position the circular opening over your stoma.

Step 2. Skin Barrier Application

Press the skin barrier into place and if necessary re-adjust the rolled adhesive to create a snug fit. Smooth and hold the skin barrier in place for 30 seconds.

Peel off the white release paper from the tape border.

Press gently against skin, smoothing out any wrinkles.

Step 3. Closing and applying the pouch

Separate the side of the pouch to allow some air to enter.

Position pouch over the skin barrier. Gently press the flanges together starting at the bottom until they "snap" in place and feel secure. Always double check the coupling is completely closed. If not, repeat the steps.

Fold the end up towards you until interlocking closures line up. Press and pinch across the entire closure to secure.

Turn the Lock-It-Pocket™ inside-out to tuck tail inside.

Step 4. Emptying and cleaning the pouch

To empty pouch, tilt the tail up towards your body. Peel open the closure and unravel tail. Unlock pouch closure and open the tail by pushing in both ends of the outlet end-strips with fingers; drain pouch.

Tips for cleaning the pouch: Support the pouch with one hand and wipe tail of pouch in firm downward motion with toilet tissue in other hand.

Clean in the inside surface of tail with toilet tissue or baby wipe.

Step 5. Removing the pouch

To remove the pouch from the skin barrier firmly pull downward on the pouch tab and lift the pouch off.

Gently pull the skin barrier down away from the skin, while supporting the adjacent skin with your other hand.

Refer to package insert for complete instructions. Please consult your Enterostomal Therapist/Healthcare Practitioner for suggestions of skin barriers specific to your skin type and reach out in case you experience any peristomal skin challenges.

CUT-TO-FIT SKIN BARRIER AND DRAINABLE BAG APPLICATION

NATURA[®]

Scan QR code to watch **Bag Application Video**

Step 1. Getting the right fit

Measure the stoma and select the appropriate size of skin barrier.

Cut-to-fit skin barriers: Trace the stoma size on the centre of the clear release line on the reverse of the barrier, then cut an opening about 3mm (1/8") larger than your tracing.

Peel off release liner and centre the opening over the stoma. Apply to clean dry skin.

Step 2. Applying and wearing the pouch

If present, peel off the white release liner from the tape border.

Press gently against skin, smoothing out any wrinkles.

Separate the side of the pouch to allow some air to enter.

Position pouch over the skin barrier. Gently press the flanges together starting at the bottom until they "snap" in place and feel secure. **Always double check the coupling is completely closed. If not, repeat the steps.**

Step 3. Closing the pouch

Fold the end up towards you until the interlocking closures line up

Press and pinch around the closure to secure.

Turn the Lock-It-Pocket™ inside-out to tuck tail inside.

Step 4. Emptying and cleaning the pouch

To empty, tilt the tail up towards your body. Peel open the closure and unravel tail. Unlock pouch closure and open the tail by pushing in both ends of the outlet end-strips with fingers; drain pouch.

Tips for cleaning the pouch: Support the pouch with one hand and wipe tail of pouch in firm downward motion with toilet tissue in other hand.

Clean in the inside surface of tail with toilet tissue or baby wipe.

Step 5. Removing the pouch

To remove pouch from the flange, hold the flange down gently with one hand and gently up-snap the pouch.

Gently pull the skin barrier down away from the skin, while supporting the adjacent skin with your other hand.

Refer to package insert for complete instructions. Please consult your Enterostomal Therapist/Healthcare Practitioner for suggestions of skin barriers specific to your skin type and reach out in case you experience any peristomal skin challenges.
